

# Fujitsu's statement on the crisis in Ukraine, cessation of operations in Russia

## **Fujitsu Limited**

Tokyo, March 14, 2022

Fujitsu regards the ongoing humanitarian crisis in Ukraine with alarm and deep concern. We strongly support the swift end of hostilities and the restoration of peace to the region, allowing those who have been affected by the conflict to resume their lives as quickly as possible.

Reflecting on the present circumstances, Fujitsu shall cease all new orders and deliveries of products and product related services in Russia. Additionally, Fujitsu will transfer responsibility for the various services it has offered to customers outside of Russia from a service center in Russia to delivery locations in other regions as soon as possible to maintain the stable continuity of services. Fujitsu will also work to minimize any possible impact on customers through the implementation of business continuity plans, and respond appropriately and decisively to any additional future developments.
