---

Dear Valued Customer,

Like so many of you, we are deeply saddened by the events and images coming from the war in Ukraine and condemn what we strongly believe to be an unjustified and unprovoked invasion by Russia.

We are announcing today that we will suspend all business activities within the Russian Federation, impacting both sales of products and the supply of materials from Russia.

As consequence of this decision, supply of certain products will be impacted by disruption to our supply chains, namely:

- 1) Certain Schottky Gen<sup>1</sup> and Gen<sup>2</sup> diode discrete products including DSA, DSB, DSS, DSSK and FUS series in all packages.
- 2) Certain bipolar power module products including MCC, MCD, MDD, MCR, MCA, MCK, MDA, MDK and MDO series products in 50mm, 60mm, 70mm and 77mm pressure contact module packages. *Please note that solder contact modules are not impacted.* At this time, we have very limited alternative options.
- 3) Certain high power (hockey puck) thyristor products including N series 19mm, 25mm and 34mm electrode diameter. In most cases alternative options are available. Please contact your local representative for assistance.

Further details of the products impacted can be found in the appendix to this letter.

We continue to work to establish alternative supply chains and/or replacement products as fast as possible. We will provide updated information on these activities at the earliest opportunity.

In the interim, we may be able to support you with alternative solutions to the problems this action inevitably creates and our local teams will do all they can to support your business.

We apologize for the disruption that this causes and certainly do not take this decision lightly.

For further information and support, please contact your local representative.

Sincerely,

A handwritten signature in black ink that reads "Chad Marak". The signature is written in a cursive, flowing style.
